Intern Software Engineer C# - Virtualization team

Role description:

In this role, you will collaborate with a cross-functional team and contribute to the Virtualization part of the SolarWinds OSH platform. You will learn to develop testable production-quality code, work with several services and APIs, and contribute to large-scale projects. Polaris team has some ex-interns who became our permanent full or part-time members and everyone in the team is ready to help you through your internship.

What do we expect:

- Excellent verbal and written communication skills and ability to work collaboratively.
- Demonstrates creativity and engagement in brainstorming ideas and solutions.
- Passion for improving skills and knowledge and willing to keep up to date with the latest technologies and design concepts.
- Experience with C# .NET.
- Ability to write Unit tests to ensure code quality and maintainability.
- Good problem-solving skills and attention to detail.

What can we offer:

- Mentorship from an experienced team.
- Opportunities for professional and career development.
- Environment, where you can openly say your thoughts.
