

Lakmoos Internships

You don't have time to read a novel about these positions, and we don't have time to write one. Take a quick look at the synopsis - if anything sparks your interest, let's chat.

Are you part of **GenZ** studying **IT** or **data science**?
Lakmoos AI offers a **paid internship opportunity**.

Mission:

We answer surveys using data models instead of real people. Our goal is to replace 20% of traditional surveys with real-time insights by 2030, saving \$30B in research costs and 35B hours of fieldwork globally each year. Shortly, we clone people.

Culture:

We are young company of ambitious GenZ that wants to do something cool. We are flexible and open to everything. Want to work from beach? Sure. Want to try a lot of different positions? Yes. Pick what you love to do and do it with us.

Current open positions are:

1. **AI/DS engineer** - Developing ML models, data transformation, data scraping, LLM testing and integration
2. **Full-stack web developer** - TypeScript, Node.JS, React, Tailwind
3. **Python engineer** - Python code optimization and refactoring, making our BE more effective
