

Software Developer in Access Control team - fresh graduate

We're looking for a Junior Software Engineer in Test to join our team in Brno. Ideally, you are a recent university graduate and have foundational knowledge of programming from the Java application stack, through database SQL, REST-based APIs, to JavaScript front-end.

The NetSuite solution is written in Java with Oracle DB as the main persistence layer. The UI uses internal JavaScript framework.

As a member of specialized platform team you will be participating on development and maintenance of Access Control backend frameworks and related User interfaces for their configuration. Collaborating closely with other cross-functional teams, you will ensure that our product meets the diverse needs of businesses across various domains. If you're passionate about driving innovation and enabling user empowerment in enterprise software, join our back-end focused team in shaping the future of ERP customization and innovation.

Oracle NetSuite engineers do more than write code. We become specialists in our business domain and take the time to deeply understand our customers' goals. We own the design of our product, bringing questions and ideas to the table and analyzing them. We develop greenfield code for new engines as well as maintain a powerful legacy codebase.

Ideal Qualifications

- Interest in quality assurance and software testing.
- Computer Science degree (Science, Technology, Engineering, and Math).
- Experience with Java or any similar object-oriented programming language with the ability to write programs and apply OOP principles.
- Natural problem-solving skills and the ability to work on functional requirements.
- Communication abilities in both technical and non-technical contexts.
- Analytical thinker who wants to work in a team environment and develop their skills.

What we will offer you

- A competitive salary with exciting benefits.

- Casual and collaborative team culture where having fun and enjoying our work is the top priority.
- Experienced, skilled and motivated team mates who enjoy helping others grow.
- Learning and development opportunities to advance your career.
- Employee resource groups that champion our diverse communities.

Starting day June 1, 2025 onward!

More info and application [here](#).
