Contents

Part I Introduction and Terminology

1 Introduction 3
References 7

2 Mathematical Background 9
2.1 Sets and Sequences 9
2.2 Relations 11
2.3 Functions 12
2.4 Graphs 12
References 13

3 Rudiments of Formal Language Theory 15
3.1 Strings and Languages 15
3.2 Language Families 19
3.3 Grammars 20
3.4 Automata 30
References 34

Part II Regulated Grammars: Fundamentals

4 Context-Based Grammatical Regulation 39
4.1 Classical Grammars Viewed as Tight-Context Regulated Grammars 40
4.1.1 Normal Forms 40
4.1.2 Uniform Rewriting 47
4.2 Context-Conditional Grammars 54
4.2.1 Definitions 55
4.2.2 Generative Power 56
4.3 Random Context Grammars 61
4.3.1 Definitions and Examples 61
4.3.2 Generative Power 63

4.4 Generalized Forbidding Grammars 66
4.4.1 Definitions 66
4.4.2 Generative Power and Reduction 67
4.5 Semi-Conditional Grammars 80
4.5.1 Definitions and Examples 80
4.5.2 Generative Power 82
4.6 Simple Semi-Conditional Grammars 83
4.6.1 Definitions and Examples 83
4.6.2 Generative Power and Reduction 85
4.7 Scattered Context Grammars 112
4.7.1 Definitions and Examples 112
4.7.2 Generative Power 116
4.7.3 Normal Forms 116
4.7.4 Reduction 119
4.7.5 LL Scattered Context Grammars 139
References 143

5 Rule-Based Grammatical Regulation 145
5.1 Regular-Controlled Grammars 146
5.1.1 Definitions and Examples 146
5.1.2 Generative Power 150
5.2 Matrix Grammars 150
5.2.1 Definitions and Examples 150
5.2.2 Generative Power 152
5.3 Programmed Grammars 152
5.3.1 Definitions and Examples 153
5.3.2 Generative Power 155
5.3.3 Normal Forms 155
5.3.4 Restricted Non-Determinism 163
5.4 State Grammars 172
5.4.1 Definitions and Examples 173
5.4.2 Generative Power 175
References 175

Part III Regulated Grammars: Special Topics

6 One-Sided Versions of Random Context Grammars 179
6.1 Definitions and Examples 182
6.2 Generative Power 186
6.2.1 One-Sided Random Context Grammars 186
6.2.2 One-Sided Forbidding Grammars 190
6.2.3 One-Sided Permitting Grammars 200
6.3 Normal Forms 202
6.4 Reduction 209
6.4.1 Total Number of Nonterminals 210

6.4.2 Number of Left and Right Random Context Nonterminals . . 216
6.4.3 Number of Right Random Context Rules 223
6.5 Leftmost Derivations 229
6.5.1 Type-1 Leftmost Derivations 230
6.5.2 Type-2 Leftmost Derivations 233
6.5.3 Type-3 Leftmost Derivations 237
6.6 Generalized One-Sided Forbidding Grammars 240
6.6.1 Definitions and Examples 241
6.6.2 Generative Power 243
6.7 LL One-Sided Random Context Grammars 251
6.7.1 Definitions 252
6.7.2 A Motivational Example 254
6.7.3 Generative Power 254
References 260

7 On Erasing Rules and Their Elimination 265
7.1 Elimination of Erasing Rules from Context-Free Grammars 266
7.1.1 The Standard Algorithm 266
7.1.2 A New Algorithm 268
7.1.3 Can Erasing Rules Be Eliminated from Regulated Grammars? 274
7.2 Workspace Theorems for Regular-Controlled Grammars 276
7.3 Generalized Restricted Erasing in Scattered Context Grammars 291
References 307

8 Extension of Languages Resulting from Regulated Grammars 309
8.1 Regular-Controlled Generators 310
8.2 Coincidental Extension of Scattered Context Languages 324
References 327

9 Sequential Rewriting over Word Monoids 329
9.1 Definitions 330
9.2 Generative Power 330
References 339

Part IV Regulated Grammars: Parallelism

10 Regulated ET0L Grammars 343
10.1 Context-Conditional ET0L Grammars 344
10.1.1 Definitions 345
10.1.2 Generative Power 346
10.2 Forbidding ET0L Grammars 352
10.2.1 Definitions and Examples 352
10.2.2 Generative Power and Reduction 354
10.3 Simple Semi-Conditional ET0L Grammars 371
10.3.1 Definitions 371

10.3.2 Generative Power and Reduction 372
10.4 Left Random Context ET0L Grammars 384
10.4.1 Definitions and Examples 385
10.4.2 Generative Power and Reduction 387
References 401

11 Uniform Regulated Rewriting in Parallel 403
11.1 Semi-Parallel Uniform Rewriting 404
11.2 Parallel Uniform Rewriting 410
References 416

12 Parallel Rewriting over Word Monoids 417
12.1 Definitions 417
12.2 Generative Power 418
References 424

Part V Regulated Grammar Systems

13 Regulated Multigenerative Grammar Systems 427
13.1 Multigenerative Grammar Systems 428
13.2 Leftmost Multigenerative Grammar Systems 444
References 456

14 Controlled Pure Grammar Systems 457
14.1 Definitions and Examples 458
14.2 Generative Power 461
References 469

Part VI Regulated Automata

15 Self-Regulating Automata 475
15.1 Self-Regulating Finite Automata 476
15.1.1 Definitions and Examples 477
15.1.2 Accepting Power 479
15.2 Self-Regulating Pushdown Automata 491
15.2.1 Definitions 491
15.2.2 Accepting Power 493
References 495

16 Automata Regulated by Control Languages 497
16.1 Finite Automata Regulated by Control Languages 498
16.1.1 Definitions 499
16.1.2 Conversions 500
16.1.3 Regular-Controlled Finite Automata 501
16.1.4 Context-Free-Controlled Finite Automata 502
16.1.5 Program-Controlled Finite Automata 503

16.2 Pushdown Automata Regulated by Control Languages 512
16.2.1 Definitions 512
16.2.2 Regular-Controlled Pushdown Automata 513
16.2.3 Linear-Controlled Pushdown Automata 514
16.2.4 One-Turn Linear-Controlled Pushdown Automata 522
References 527

Part VII Related Unregulated Automata

17 Jumping Finite Automata 531
17.1 Definitions and Examples 533
17.2 Basic Properties 535
17.3 Relations with Well-Known Language Families 537
17.4 Closure Properties 538
17.5 Decidability 542
17.6 An Infinite Hierarchy of Language Families 543
17.7 Left and Right Jumps 544
17.8 A Variety of Start Configurations 546
References 549

18 Deep Pushdown Automata 551
18.1 Definitions and Examples 553
18.2 Accepting Power 555
References 564

Part VIII Applications

19 Applications: Overview 569
19.1 Current Applications 569
19.2 Perspectives 573
References 576

20 Case Studies 579
20.1 Linguistics 580
20.1.1 Syntax and Related Linguistic Terminology 581
20.1.2 Transformational Scattered Context Grammars 585
20.1.3 Scattered Context in English Syntax 588
20.2 Biology 597
20.2.1 Simulation of Biological Organisms 597
20.2.2 Implementation 603
20.3 Compilers 610
20.3.1 Underlying Formal Model 611
20.3.2 Implementation 612
References 613

Part IX Conclusion

21 Concluding Remarks 617
21.1 New Trends and Their Expected Investigation 618
21.2 Open Problem Areas 619
21.3 Bibliographical and Historical Remarks 621
References 624

22 Summary 637
References 646

Language Family Index 647

Subject Index 653
